

Interaction design

By Mike Schaatsbergen, Matthijs Berghuis and Robbe van der Lee for the GATO project

Designs:

Look for the designs of our webpage in our Github. Here you can find designs for each page. You can find them here:

<https://github.com/RobbeLee/Gato/tree/master/designs>

What happens when a user hovers over or clicks on an image?

When a user hovers on a post, the post will be “highlighted”. This means there will come a little gradient over the post to show that you’ve selected that post.

When you click on it the post will enlarge and you will be able to see the full caption and the comments.
